

# Replication Dossier

One page per finding. Filled in before the finding is used, kept after it is settled. A finding that cannot be re-derived from this sheet is not finished.

---

Dossier no.

## 1 • QUESTION

One sentence. What is being decided, and what would change if the answer were different.

---

---

## 2 • INPUTS

Every source used — file, report, page, date received. A source not listed here was not used.

---

---

---

## 3 • METHOD

The steps, in order, specific enough that a second person reaches the same number without asking.

---

---

---

---

## 4 • CHECKS

What was tested to catch a wrong answer. Tick only what was actually run.

☐ Cross-total agrees with the source document

☐ A known-good case was re-derived correctly

☐ Independent second source compared

☐ Result converted to a unit with a known range

☐ Other:

---

## 5 • RESULT

The finding, stated plainly, with its precision and its limits.

---

---

## 6 • REPLICATE

Exactly what a second person opens and runs to reproduce the result from scratch.

---

---

## 7 • OPEN EDGES

---

What this dossier does not settle — the inputs still unverified, the questions it raises.
